

Annual Distributed Generation Report Metadata

Minnesota data through, December 31, 2020

Section 1: Overview

<u>Data Originator:</u>	Minnesota Public Utilities Commission
<u>Title:</u>	Utility Distributed Generation Data, Minnesota, June, 2021
<u>Abstract:</u>	<p>Under Minn. Stat. 216B.1611 Minnesota utilities submit an annual report on distributed generation interconnected with the utility's distribution system. These reports are filed annual in dockets ending in - 10 (ex, 18-10, 19-10). Data here reflects reports filed in Docket 20-10. This data includes all systems through Dec. 31, 2019 as reported by utilities. There may be unreported systems if a utility did not file a report in a given year. Utilities report systems that are:</p> <ul style="list-style-type: none">• Interconnected with the distribution system• Less than 10 MW in size• Are designed to operate in parallel with the utility distribution system
<u>Update Frequency:</u>	Annual
<u>Time Period of Data:</u>	Interconnection data is current for all reported utilities through December 31, 2020.
<u>Data Location:</u>	Minnesota
<u>Contact Information:</u>	<p>Hanna Terwilliger, Rates Analyst Minnesota Public Utilities Commission 121 7th Place, Suite 350 St. Paul, MN 55101 Phone: 651-201-2243 Email: hanna.terwilliger@state.mn.us</p>

Section 2: Data Quality

<u>Data Accuracy:</u>	Staff corrected for inaccuracies where data was entered in the wrong column. Year installed was also added where possible by filling in information from prior year reports. All references to customer names and addresses were removed.
<u>Completeness:</u>	<p>Includes all reports filed by June 1, 2021. Some utilities did not report. Please see Appendix A for a complete list of utility filing status.</p> <p>Any blank spaces in the data set were not completed by the utility. Per Minn. Stat. 216B.1611 Subd. 3a(c), "Electric utilities collecting and transferring data under this subdivision are not responsible for the accuracy, completeness, or quality of the information under this subdivision."</p>

“Protected” indicates that the utility has deemed the material not for public consumption. Details on the reasoning can be found in each individual utility filing.

History: Minn. Stat. 216B.1611 requires utilities to submit annual reports on distributed generation interconnected with their distribution system. In 2014 the Minnesota Legislature amended the statute to require additional reporting requirements. The Minnesota Commerce Department and Minnesota Public Utilities Commission collect the information through a standardized form.

Section 3: Attributes

Category	Definition	Notes
Utility	The utility with which the system is interconnected	
MN Utility ID	Minnesota Utility ID number	
Utility Type	What type of utility	Municipal, Cooperative, or Investor Owned utility
DER Identifier	Unique identifier for each facility	
DER Capacity (kW AC)	The capacity of the facility in kW _{AC}	Utilities have been asked to convert any systems previously reported in kW DC to kW AC
DER Type	The type of generation facility	Reported categories include: <ul style="list-style-type: none"> • Biogas • Biomass • Hydro • Municipal Solid Waste • Natural Gas • Solar • Storage • Wind
CHP	Combined Heat and Power	An “X” indicates that the facility is CHP
Storage	If the DER has non-exporting storage associated with the device	An “X” indicates the presence of storage
DER Status	The status of the DER Facility	<u>Interconnected</u> : The facility is connected to the utility’s grid and generating electricity <u>Active Application</u> : the facility is in the process of interconnecting with the utility <u>Withdrawn</u> : the application to interconnect was withdrawn by the facility <u>Decommissioned</u> : a formerly interconnected facility is no longer connected to the utility

City	The city in which the facility is located	
Zip Code	The zip code in which the facility is located	
Substation ID	The substation where the facility is interconnected	
Feeder ID	The feeder where the facility is interconnected	
Type of Customer		<p>Options are:</p> <ul style="list-style-type: none"> • Residential • Commercial • Public (such as a school or government entity) • Utility • CSG (community solar garden) • Blank indicates that the utility did not fill out the category. <p>Please note that these are a utility's best estimate and are intended only to get a general sense of the type of installation. A residential installation at one utility may be determined commercial by another (for example, a farm property)</p>
Utility Incentive Program	Whether or not the facility received some kind of incentive from the utility	For example, Made In Minnesota, Xcel's Solar*Rewards, Minnesota Power's SolarSense.
Total Installed Cost without Incentives	The cost of the system before any federal or utility incentives	Required after 2014. If the category is blank either the utility did not report, or the installer did not fill out the amount during the interconnection process
Year Application submitted	The year in which the facility applied for interconnection	
Year Interconnected	The year in which the facility interconnected with the utility	An N/A indicates that the facility is either a pending or cancelled application. If the category is blank the utility did not provide a year
Year Decommissioned	If the facility has been decommissioned, the year in which it occurred
